

# SNOWMAN SLUSH

NO SUNSHINE NEEDED to make this melting snowman magnet!

## What You'll Need:

foil

scissors

small plastic bottle cap

cotton ball

paintbrush and black paint

school glue

magnet

construction paper

short orange pipe cleaner piece (cut by a grownup)

snowman parts like buttons, beads, twigs, and ribbon

## What to Do:

1. Roll out the foil. Cut out a construction paper circle a little bigger than the bottle cap. (You can trace a gallon milk jug lid.) Glue the cap onto the circle to make a top hat. Let dry.
2. Fold the pipe cleaner piece in half. Glue the pointy ends to the cotton ball. Hold until dry.
3. Put glue on the bottom of the hat. Stick the cotton ball on the hat with the carrot nose in the center of the face. Let dry.
4. Paint a sad snowman face. Let dry.
5. Set the magnet on the foil. Squeeze a thick puddle of glue over the magnet and below it.
6. Put the snowman head in the glue on top of the magnet. Gently place the snowman parts in the glue puddle.
7. Wait until the glue is a solid piece that peels off the foil. This may take a day or more. Then stick on your fridge, or give as a goofy gift.
