

# OPHELIA'S LAST WORD

## Big Buggy Bubbles

**SAM IS BURSTING** with excitement to share his latest, greatest inventions: Sam's brilliant big-bubble wonder wand and special super-sudsy solution.

### What You'll Need:

### What to Do:

1. Pour the water, soap, syrup, cornstarch, and baking powder into the pan. Gently mix together. Let settle until it is not foamy.
2. Slide the twine through the straw. Keep pulling the twine until the straw is in the middle.
3. Tie the end of the twine tightly to one edge of the hanger. Repeat with the twine's other end on the hanger's other edge.
4. Head outside with your supplies. Holding the hanger by the hook, dip your bubble wand into the pan. Carefully pull up so shiny film stretches across both parts. If the film breaks, dip again.
5. Slowly and steadily wave your wand and walk. Keep finetuning your smooth moves until humongous bubbles fill the sky.
6. Store leftover solution in the fridge for another day of bubble play.
